

Pasco Construction Solutions Pty Ltd successfully completed a major upgrade for the Overseas Passenger Terminal in Sydney by using the Buzon Pedestal System.

The Overseas Passenger Terminal (OPT) is Sydney's unique venue. Located in Sydney's historic "Rocks" Circular Quay, the OPT has a dazzling, uninterrupted view of the Opera House, Sydney Harbour and city skyline. It is where some of the world's luxury cruise liners, including the Queen Elisabeth II, berth during their stay in Sydney.

Sydney Ports Corporation had several years of issues associated with the pavers on the Cruiser Terminal balcony that had originally been installed on a paver support that incorporated a "chock" adjustment system. The system was limited as the pavers and supports had to be continually re-adjusted and made stable, which was a tedious and expensive maintenance process. The Buzon Pedestal System was selected to resolve this problem.

In 2010, rectification works were undertaken to replace both the waterproofing membrane and paver supports on the 700 square metre Cruiser Terminal balcony. Pasco supplied 6000 Buzon Pedestals for the project and the installation was successfully completed in early 2011 resulting in a stable and maintenance free surface. To date Sydney Ports Corporation have had no issues with the Buzon Pedestals.

Pasco Construction Solutions Pty Ltd has for many years supplied an extensive range of waterproofing and sealant products to the Australian market. In mid 2006 the company was introduced to Buzon Pedestal International and was appointed as the exclusive distributor of Buzon Pedestal System in Australia.

Since that time the two companies have forged an extremely strong relationship which has resulted in supplying close to 500,000 pedestals to many prestigious projects across Australia, such as Evolve Sydney, Royal Children's Hospital Melbourne, Myer Headquarters Melbourne, Sphere Gold Coast, Langham Hotel Southgate, Monash Children's Hospital Melbourne, Epworth Hospital Melbourne, 150 Clarendon St. Melbourne, Tribeca Apartments Melbourne, and etc.
